

## November 13, 14, 15 ... Online anywhere with Zoom

Join us as we team up to explore the latest scientific discovery that has led to an even greater discovery in personal thriving. Info-Looping has the potential to render untold benefit to ourselves and our environment, whether that includes those around us whom we love or surrounding ourselves with wellness and the abundance of life. Truthfully, there is no limit to where we can foster betterment or improvement because the universe itself flows with the resident purpose of providing the fullness of life. The capacity to thrive rules the universe. We have only to recognize that belief systems and self-made blocks have kept us from remembering this, because thriving was meant from the inception of creation. And this thriving flows through Info-Looping.

Topics we'll explore together:

- 1. How does Info-Looping work?
- 2. What is "Inherent Thriving," and how do we tap into it?
- 3. Discover techniques that will foster wellness and wholeness.
- 4. Learn the steps to Info-Looping and Inherent-Thriving
