

# RISE OF THE VISIONSEERS:

## A New Year Message from the Other-Realm

by GW Hardin & Zari Pirasteh

We travail, at this time, through the greatest chaos in human history. Why? Some two thousand years ago the Star of Bethlehem presaged the coming of the Messiah during a time when unparalleled suffering weighed down humanity. However, a New Star of Bethlehem has arrived as the conjunction of Jupiter and Saturn. And once again this Star of Bethlehem is presaging the end of one age with the beginning of another. Instead of angels heralding the coming of peace on Earth, beings from the Other-Realm are announcing the rise of the VisionSeekers. What does this mean?

Anthropologist and shamanic teacher, Hank Wesselman, PhD, first introduced the phenomenon of visionseekers in his book *Visionseeker: Shared Wisdom from the Place of Refuge* (Hay House, 2002). Wesselman's "Modern Mystical Movement," based on eight visions, includes the awakening of visionseekers. His visions center around time-shifts, which take us to what we would call the "future." But this is where I part ways with Wesselman, because of what has recently happened. Instead, I call forth the VisionSeers, who truly have no need of awakening, who replace time-shifts with transitions across time. As a culture, we have never truly understood time. But that may now change. For a new message stands before us from across time.

Let us parse this message into three parts:

1. The Message from a VisionSeer
2. Seeing the Other-Realm
3. Calling of the VisionSeers

### THE MESSAGE FROM A VISIONSEER

In my previous article, "[We of the Unknown Universe](#)," we ventured into an unknown aspect of existence, called "time-space." Which differed from what is typically experienced in ordinary reality as space-time, which consists of 3 dimensions of space (x, y, and z coordinates) and 1 dimension of what humans understand as time (differentiated linearly from past to present to future). To simplify this notion of the unknown universe, I renamed the unexplored existence the "Other-Realm," in hopes your brain won't shut down rebelling against complex, new laws of physics. I learned a long time ago, if you don't want to put people to sleep, keep it simple.

For many years I have worked with a gifted friend who is a recognized VisionSeer — Zari. Our journeys have run parallel to a surprising degree. Zari has a thriving practice across the Front Range, which includes programs, classes, and certification for those who wish to continue her tradition. Simply put, I adore her. For she has been a fortress protecting humanity in ways many can't come close to understanding, wrapping herself in garments of humility girded by cinctures of unwavering truth. She is no-nonsense but kind. And not to be fooled with. So imagine my surprise when we sit down for lunch and she brings up the topic of timeless time where an entire new order of beings emerges as angelic counterparts to our world of ordinary reality. Though, truthfully, some have trouble seeing angels as ordinary.

That conversation led to the writing of this article. It turns out that both of us were given messages. And upon comparing them, we decided to release Zari's message from the Other-Realm. Zari calls these beings "Divine Messengers."

*So, for December the Divine Messengers said to be ready for 2021. For the first part of the year humans will be left alone with each other. Humanity needs to work with time-space (Other-Realm) rather than with space-time (normal reality). When we work with the Other-Realm we allow the force of time to open itself up and to create a playground for all entities to have experiences. If we choose to constrain ourselves to the ordinary (space-time) we squeeze time into a line (single dimension) with a lot of limitations. Only humans believe in these limitations, and that is the basis for all ongoing human problems.*

What Zari is conveying is not just a vision that she sees. She is encouraging all of humanity to see with new eyes, trusting within that we have the ability to see beyond past limitations if we dare to believe in ourselves enough to venture into what I have described as the Unknown Universe. What Zari is implying is that this ability is actually innately within us. The message continues:

*So the Divine Messengers said that during the first hours of 1/1/21 a huge wave shall come into the planet and instantly go through everything, awakening a part of memory in each when long ago we were able to work with the fabric of time (and not just space). Some of us will experience a little strangeness but in 98% of humanity this wave will stir a great unsettling. And when humans do not feel good they become angry and start pointing fingers at each other, blaming others.*

*During the first part of January stay away from the public as much as you are able. For this is the start of our final ascension.*

## **SEEING THE OTHER-REALM**

This message is simple in its scope but vast in its consequences. What humanity is facing is a whole new existence where everything as we know it can be transformed. Our institutions will face immense change, no longer based on ancient principles of survival-of-the-fittest or scarcity or obsolescence. Healthcare will move beyond pharmaceutically-based medicine and move toward harmonic resonance with DNA and RNA that allows cellular and organ regeneration. Banks will no longer govern our wealth. And politics will move beyond adversarial organizations and into cooperative networks. Can we as a people recognize our forgotten ability to use vision-seeing as a tool to call into existence these new realities? Can we return to “working with the fabric of time”? The experiments we have been conducting say Yes.

The Divine Messengers aren't here to rescue us or do anything for us because that in and of itself would be a complete act of human disempowerment. We must first re-discover the visionseer within ourselves. And to do this I am proposing the creation of a network in which all and any may choose to

participate. This network will be based on already existing methods that can easily be added to by teaching/learning with one another.

## **CALLING THE VISIONSEERS**

Depending on what kind of response I get from this mailing, Zari and I will send out another mailing in which we present an introductory webinar on how to form circles of VisionSeers. Once formed, we can then re-introduce folks into how to access time-space (the Other-Realm) and how to use that ability to interact with ordinary reality.

One form of our experiments has been with Power of 8 groups in which the group moves into the position of assisting others by presenting visions in response to the questions they ask or the advice they seek. The format is similar enough to Power of 8 that most have found this not only easier than expected but adventuresome when learning how to access time-space or the Other-Realm.

If the interest is significant enough, I'll consider turning the topic of the rise of the VisionSeers into a third part of the Course in Wonders. And as before will introduce supportive talent that has worked with me already in various ways to interact with the Other-Realm.

Zari tells us that the Divine Messengers say we are at the starting point of human ascension. I, too, have been visited by these beings. Though my talents don't include clairaudience, I have nonetheless been shown that a whole new counterpart to the angelics are here to interact with humanity in ways we've never seen before. This interaction will not be treating humans as though they need assistance but support humanity as equals in moving upward through the fabric of time. There is no longer a separation between Heaven and Earth. Heaven and Earth are integrating as one realm bridged by the fabric of time. For now it is easier to look at this as Present-Time and the Other-Realm, but that will change as we change reality around us.

The Star that once heralded peace on Earth while angels chanted joy to the world is now heralding the union of Heaven and Earth in which Darkness is transformed into Light through us. In which Sadness is transformed into Joy ... through us. In which Poverty is transformed into Riches ... through us ... as we step forward into humanity's Ascension.

From here on out, we no longer allow the enslavement of free will nor do we allow limitations upon our consciousness. We are boundless in our journey across the Fabric-of-Time, inherent denizens of the Other-Realm working in harmony with the Divine Messengers. May the rise of the VisionSeers tell us even more in the coming days for we are no longer constrained by the ordinary ... ever to remember that we are a glorious people.
